

# LIAM O'CONNOR

FULL STACK

## Senior Full Stack Python Developer

Email: liam.oconnor@email.com Phone: +1 (555) 016-7788 Location: Seattle, WA GitHub: github.com/liam-python-fullstack

### PROFESSIONAL SUMMARY

Senior Full Stack Developer with 7+ years of experience architecting end-to-end cloud applications using Python (Django/FastAPI) and modern JavaScript frameworks (React/TypeScript). Track record of leading developer teams and scaling SaaS applications.

### CORE COMPETENCIES

**Languages & Frameworks:** Python, Django, FastAPI, JavaScript (ES6+), TypeScript, React, Redux Toolkit  
**Infrastructure & DevOps:** AWS (EKS, Lambda, CloudFront), Docker, Kubernetes, Terraform, CI/CD Pipelines  
**Databases & Architecture:** PostgreSQL, MongoDB, Redis, GraphQL, Microservices, System Design

### PROFESSIONAL EXPERIENCE

#### Senior Full Stack Developer | Zenith Cloud Platforms

2021 – Present

- Led a team of 6 engineers in migrating a monolithic web portal into a containerized microservices architecture using Django, React, and AWS EKS.
- Engineered a real-time collaborative workspace interface using WebSockets and FastAPI, handling 10,000+ simultaneous connections.
- Configured Terraform IaC scripts to standardize cloud infrastructure deployment, reducing environment setup times by 70%.

#### Full Stack Python Developer | NextGen Innovations

2017 – 2021

- Built customer management dashboards using React and Django REST Framework, driving a 25% increase in user engagement.
- Implemented OAuth2 single sign-on (SSO) and role-based access control (RBAC) across corporate application suites.

### EDUCATION & CERTIFICATIONS

**B.S. in Computer Science** - University of Washington

2013 – 2017

**Certifications:** AWS Certified Solutions Architect – Associate
