

Python Data Engineer & Automation Specialist

Email: siddharth.patel@email.com Phone: +1 (555) 019-4411 Location: San Jose, CA LinkedIn: linkedin.com/in/siddharth-patel-data

PROFESSIONAL SUMMARY

Data Engineer specializing in Python-based ETL pipeline development, workflow orchestration, data warehousing, and process automation. Experienced processing terabyte-scale datasets using PySpark, Pandas, Airflow, and Snowflake.

TECHNICAL SKILLS

Python Ecosystem: Pandas, NumPy, PySpark, Scrapy, Selenium, SQLAlchemy, Airflow

Data Warehousing & SQL: Snowflake, AWS Redshift, PostgreSQL, Advanced SQL, Query Tuning

Tools & Cloud: Apache Airflow, Docker, AWS (S3, Glue, Lambda, Athena), Git, Linux/Bash Scripting

PROFESSIONAL EXPERIENCE

Senior Data Engineer | DataStream Analytics2021 – Present

- Designed and automated robust Python ETL pipelines using Apache Airflow and PySpark, ingesting 5TB+ daily raw data into Snowflake.
- Developed automated web scraping frameworks using Scrapy and Selenium to extract unstructured data from 200+ vendor websites.
- Optimized PySpark batch jobs and Snowflake data transformation queries, cutting data processing costs by \$120,000 annually.

Python Automation Developer | OmniProcess Solutions2018 – 2021

- Automated manual data verification workflows by creating Python scripts, saving 150+ operational staff hours monthly.
- Built serverless data validation functions on AWS Lambda triggered by S3 bucket document uploads.

EDUCATION

B.S. in Information Systems & Statistics - San Jose State University2014 – 2018
