

Senior DevOps & Cloud Infrastructure Engineer

Email: d.brooks@email.com Phone: +1 (555) 019-1122 Location: Denver, CO GitHub: github.com/dbrooks-devops

PROFESSIONAL SUMMARY

DevOps Engineer with 6+ years of experience designing scalable cloud infrastructure, Infrastructure as Code (IaC), and automated CI/CD deployment pipelines on AWS and Kubernetes.

CORE COMPETENCIES

Cloud Platforms: AWS (EKS, EC2, S3, RDS, CloudFront), GCP, Azure

IaC & Containers: Terraform, Ansible, Docker, Kubernetes, Helm, CloudFormation

CI/CD & Monitoring: Jenkins, GitHub Actions, GitLab CI, Prometheus, Grafana, Datadog

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | CloudNative Technologies2021 – Present

- Migrated legacy monolithic application infrastructure to AWS EKS Kubernetes clusters, reaching 99.99% system availability.
- Automated infrastructure provisioning using Terraform, reducing cloud environment deployment time from days to 15 minutes.
- Constructed Grafana and Prometheus monitoring dashboards with automated alerting, lowering MTTR by 50%.

Cloud Operations Engineer | Infrastructure Labs2018 – 2021

- Built automated CI/CD pipelines via GitHub Actions for seamless zero-downtime deployment releases.
- Optimized cloud resource storage lifecycles, cutting annual AWS infrastructure overhead by \$180,000.

EDUCATION

B.S. in Computer Engineering - Colorado School of Mines2014 – 2018

Certifications: AWS Certified DevOps Engineer Professional, Certified Kubernetes Administrator (CKA)
